Ecological

APPLICATIONS

OFFICIAL PUBLICATION OF THE
ECOLOGICAL SOCIETY OF AMERICA

Volume 3, 1993

Published Quarterly at Tempe, Arizona
by the
Ecological Society of America

This paper meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

The Ecological Society of America

OFFICERS FOR 1993–1994

President:
JERRY F. FRANKLIN, University of Washington

Vice President:
PATRICE A. MORROW, University of Minnesota

Secretary:
ROBERT K. PEET, University of North Carolina

Treasurer:
LOUIS F. PITELKA, Electric Power Research Institute

Business Manager:
DUNCAN T. PATTEN, Arizona State University

AIMS

The Ecological Society of America was founded in 1915 for the purpose of unifying the science of ecology, stimulating research in all aspects of the discipline, encouraging communication among ecologists, and promoting the responsible application of ecological data and principles to the solution of environmental problems. Ecology is the scientific discipline that is concerned with the relationships between organisms and their past, present, and future environments. These relationships include physiological responses of individuals, structure and dynamics of populations, interactions among species, organization of biological communities, and processing of energy and matter in ecosystems.

MEMBERSHIP

Membership is open to persons who are interested in the advancement of ecology or its applications, and to those who are engaged in any aspect of the study of organisms in relation to environment.

The classes of membership and their annual dues for 1994 are:

Developed Countries

Regular member: $40.00
Student member: $18.00
Life member: Contact the Business Manager
Emeritus member: Free

Subscriptions to the journals are **not** included in the dues for *Regular, Student,* and *Emeritus* members. See below for membership subscription rates. *Regular* and *Student* members who do not wish to receive the Bulletin may subtract $5.00 from their membership dues.

Developing Countries

Special member - A (includes subscription to Ecology) $30.00
Special member - B (includes subscription to Ecology + Ecological Monographs + Ecological Applications) $40.00

Special members are those in developing countries. For this class of membership only, the membership dues and journal subscriptions are combined.

PUBLICATIONS

The Society publishes a bulletin and three journals. The Bulletin of the Ecological Society of America, issued quarterly, contains announcements of meetings of the Society and related organizations, programs, awards, articles, and items of current interest to members. The journal Ecology, issued eight times a year, publishes essays and articles that report and interpret the results of original scientific research in basic and applied ecology. Ecological Monographs is a quarterly journal for longer ecological research articles. Ecological Applications, published quarterly, contains ecological research and discussion papers that have specific relevance to environmental management and policy.

1994 subscriptions are available to ESA members as follows:

	Regular	Student		Regular	Student
Ecology	$50.00	$35.00	Ecological Applications	$25.00	$20.00
Ecological Monographs	$20.00	$15.00	Bulletin of the Ecological Society of America	Free to members	

Reduced subscription rates are available for *Emeritus members* (contact the Business Manager).

Application blanks for membership may be obtained from the Business Manager, to whom all correspondence concerning membership should be addressed. Checks accompanying membership applications should be made payable to the Ecological Society of America.

TABLE OF CONTENTS

VOLUME 3, 1993

NUMBER 1, FEBRUARY

Forum—Grazing Theory and Rangeland Management

LEVIN, S. A.
Grazing theory and rangeland management 1
PAINTER, E. L., AND A. J. BELSKY
Application of herbivore optimization theory to rangelands of the western United States 2–9
DYER, M. I., C. L. TURNER, AND T. R. SEASTEDT
Herbivory and its consequences 10–16
MCNAUGHTON, S. J.
Grasses and grazers, science and management 17–20
TRLICA, M. J., AND L. R. RITTENHOUSE
Grazing and plant performance 21–23
BRISKE, D. D.
Grazing optimization: a plea for a balanced perspective 24–26
BARTOLOME, J. W.
Application of herbivore optimization theory to rangelands of the western United States 27–29
DEANGELIS, D. L., AND M. A. HUSTON
Further considerations on the debate over herbivore optimization theory 30–31
NOY-MEIR, I.
Compensating growth of grazed plants and its relevance to the use of rangelands 32–34
PATTEN, D. T.
Herbivore optimization and overcompensation: does native herbivory on western rangelands support these theories? 35–36
RISSER, P. G.
Making ecological information practical for resource managers 37–38

Weed Management

LIEBMAN, M., AND E. DYCK
Weed management: a need to develop ecological approaches 39–41
KREMER, R. J.
Management of weed seed banks with microorganisms 42–52
MOHLER, C. L.
A model of the effects of tillage on emergence of weed seedlings 53–73
FORCELLA, F., K. ERADAT-OSKOUI, AND S. W. WAGNER
Application of weed seedbank ecology to low-input crop management 74–83
JORDAN, N.
Prospects for weed control through crop interference 84–91
LIEBMAN, M., AND E. DYCK
Crop rotation and intercropping strategies for weed management 92–122

Other Articles

ZEDLER, J. B.
Canopy architecture of natural and planted cordgrass marshes: selecting habitat evaluation criteria 123–138
MEADOR, J. P., F. B. TAUB, AND T. H. SIBLEY
Copper dynamics and the mechanism of ecosystem level recovery in a standardized aquatic microcosm .. 139–155
ABER, J. D., A. MAGILL, R. BOONE, J. M. MELILLO, P. STEUDLER, AND R. BOWDEN
Plant and soil responses to chronic nitrogen additions at the Harvard Forest, Massachusetts 156–166
MITCHELL, R. J., B. R. ZUTTER, T. H. GREEN, M. A. PERRY, D. H. GJERSTAD, AND G. R. GLOVER
Spatial and temporal variation in competitive effects on soil moisture and pine response 167–174
TURNER, C. L., T. R. SEASTEDT, AND M. I. DYER
Maximization of aboveground grassland production: the role of defoliation frequency, intensity, and history 175–186
TURCHIN, P., AND W. T. THOENY
Quantifying dispersal of southern pine beetles with mark–recapture experiments and a diffusion model ... 187–198

Instructions to Authors 200

NUMBER 2, MAY

Forum—Preserving Biodiversity

LEVIN, S. A.
Preserving biodiversity 201
FRANKLIN, J. F.
Preserving biodiversity: species, ecosystems, or landscapes? 202–205
ORIANS, G. H.
Endangered at what level? 206–208
NAIMAN, R. J., H. DÉCAMPS, AND M. POLLOCK
The role of riparian corridors in maintaining regional biodiversity 209–212
IRWIN, L. L., AND T. B. WIGLEY
Toward an experimental basis for protecting forest wildlife 213–217
WILCOVE, D.
Getting ahead of the extinction curve 218–220

Other Articles

MANGEL, M.
Effects of high-seas driftnet fisheries on the northern right whale dolphin *Lissodelphis borealis* 221–229
FLEMING, I. A., AND M. R. GROSS
Breeding success of hatchery and wild coho salmon (*Oncorhynchus kisutch*) in competition 230–245
BALTZ, D. M., AND P. B. MOYLE
Invasion resistance to introduced species by a native assemblage of California stream fishes 246–255
BRUGGER, K. E., P. NOL, AND C. I. PHILLIPS
Sucrose repellency to European Starlings: will high-sucrose cultivars deter bird damage to fruit? 256–261
CLARK, L., AND J. R. MASON
Interaction between sensory and postingestional repellents in starlings: methyl anthranilate and sucrose ... 262–270
WELTER, S. C., AND J. W. STEGGALL
Contrasting the tolerance of wild and domesticated tomatoes to herbivory: agroecological implications 271–278
POIANI, K. A., AND W. C. JOHNSON
A spatial simulation model of hydrology and vegetation dynamics in semi-permanent prairie wetlands ... 279–293
MLADENOFF, D. J., M. A. WHITE, J. PASTOR, AND T. R. CROW
Comparing spatial pattern in unaltered old-growth and disturbed forest landscapes 294–306
STROMBERG, J. C., S. D. WILKINS, AND J. A. TRESS
Vegetation–hydrology models: implications for management of *Prosopis velutina* (velvet mesquite) riparian ecosystems 307–314
CRABTREE, R. C., AND F. A. BAZZAZ
Seedling response of four birch species to simulated nitrogen deposition: ammonium vs. nitrate 315–321
MORRISON, M. L., AND M. G. RAPHAEL
Modeling the dynamics of snags 322–330
SCHROETER, S. C., J. D. DIXON, J. KASTENDIEK, R. O. SMITH, AND J. R. BENCE
Detecting the ecological effects of environmental impacts: a case study of kelp forest invertebrates 331–350
GREEN, R. H., AND R. C. YOUNG
Sampling to detect rare species 351–356
RUDNICKY, T. C., AND M. L. HUNTER, JR.
Reversing the fragmentation perspective: effects of clearcut size on bird species richness in Maine 357–366

NUMBER 3, AUGUST

Ecotones

RISSER, P. G.
Ecotones 367–368
GOSZ, J. R.
Ecotone hierarchies 369–376
CRUMLEY, C. L.
Analyzing historic ecotonal shifts 377–384
NEILSON, R. P.
Transient ecotone response to climatic change: some conceptual and modelling approaches 385–395
NOBLE, I. R.
A model of the responses of ecotones to climate change 396–403

WOODWARD, F. I.
The lowland-to-upland transition—modelling plant responses to environmental change 404–408
RUSEK, J.
Air-pollution-mediated changes in alpine ecosystems and ecotones 409–416
MARTÍNEZ, E., AND E. FUENTES
Can we extrapolate the California model of grassland–shrubland ecotone? 417–423
JOHNSTON, C. A.
Material fluxes across wetland ecotones in northern landscapes 424–440
DÉCAMPS, H.
River margins and environmental change 441–445

Other Articles

CRAFT, C. B., AND C. J. RICHARDSON
Peat accretion and N, P, and organic C accumulation in nutrient-enriched and unenriched Everglades peatlands 446–458
OLLINGER, S. V., J. D. ABER, G. M. LOVETT, S. E. MILLHAM, R. G. LATHROP, AND J. M. ELLIS
A spatial model of atmospheric deposition for the northeastern U.S. 459–472
LAWRENCE, G. B., AND I. J. FERNANDEZ
A reassessment of areal variability of throughfall deposition measurements 473–480
HANSEN, A. J., S. L. GARMAN, B. MARKS, AND D. L. URBAN
An approach for managing vertebrate diversity across multiple-use landscapes 481–496
MURDEN, S. B., AND K. L. RISENHOOVER
Effects of habitat enrichment on patterns of diet selection 497–505
ARITA, H. T.
Rarity in neotropical bats: correlations with phylogeny, diet, and body mass 506–517
BHAT, M. G., R. G. HUFFAKER, AND S. M. LENHART
Controlling forest damage by dispersive beaver populations: centralized optimal management strategy 518–530
KINSOLVING, A. D., AND M. B. BAIN
Fish assemblage recovery along a riverine disturbance gradient 531–544

NUMBER 4, NOVEMBER

Forum—Perspectives on Sustainability

LEVIN, S. A.
Science and sustainability 545–546
LUDWIG, D., R. HILBORN, AND C. WALTERS
Uncertainty, resource exploitation, and conservation: lessons from history (Reprinted from *Science*) 547–549
HILBORN, R., AND D. LUDWIG
The limits of applied ecological research 550–552
HOLLING, C. S.
Investing in research for sustainability 552–555
LUDWIG, D.
Environmental sustainability: magic, science, and religion in natural resource management 555–558
EHRLICH, P. R., AND G. C. DAILY
Science and the management of natural resources 558–560
LEE, K. N.
Greed, scale mismatch, and learning 560–564
MOONEY, H. A., AND O. E. SALA
Science and sustainable use 564–566
PITELKA, L. F., AND F. A. PITELKA
Environmental decision making: multidimensional dilemmas 566–568
MEYER, J. L., AND G. S. HELFMAN
The ecological basis of sustainability 569–571
SLOBODKIN, L. B.
Scientific goals require literal empirical assumptions 571–573
MANGEL, M., R. J. HOFMAN, E. A. NORSE, AND J. R. TWISS, JR.
Sustainability and ecological research 573–575
FUENTES, E. R.
Scientific research and sustainable development 576–577
ZEDLER, J. B.
Lessons on preventing overexploitation? 577–578

COSTANZA, R.
Developing ecological research that is relevant for achieving sustainability 579–581
SOCOLOW, R. H.
Achieving sustainable development that is mindful of human imperfection 581–583
POLICANSKY, D.
Uncertainty, knowledge, and resource management 583–584
RUBENSTEIN, D. I.
Science and the pursuit of a sustainable world 585–587
SALWASSER, H.
Sustainability needs more than better science 587–589

Letters to the Editor

BRESHEARS, D. D., F. W. WHICKER, AND T. E. HAKONSON
Orchestrating environmental research and assessment for remediation 590–594

Other Articles

WIENS, J. A., D. T. PATTEN, AND D. B. BOTKIN
Assessing ecological impact assessment: lessons from Mono Lake, California 595–609
BELL, S. S., L. A. J. CLEMENTS, AND J. KURDZIEL
Production in natural and restored seagrasses: a case study of a macrobenthic polychaete 610–621
KRYUCHKOV, V. V.
Extreme anthropogenic loads and the northern ecosystem condition 622–630
PLUMB, G. E., AND J. L. DODD
Foraging ecology of bison and cattle on a mixed prairie: implications for natural area management 631–643
OWENSBY, C. E., P. I. COYNE, J. M. HAM, L. M. AUEN, AND A. K. KNAPP
Biomass production in a tallgrass prairie ecosystem exposed to ambient and elevated CO_2 644–653
DYER, M. I., D. C. COLEMAN, D. W. FRECKMAN, AND S. J. MCNAUGHTON
Measuring heterotroph-induced source–sink relationships in *Panicum coloratum* with ^{11}C technology 654–665
COMINS, H. N., AND R. E. MCMURTRIE
Long-term response of nutrient-limited forests to CO_2 enrichment; equilibrium behavior of plant–soil models 666–681
MCEVOY, P. B., AND N. T. RUDD
Effects of vegetation disturbances on insect biological control of tansy ragwort, *Senecio jacobaea* 682–698
ENGLISH-LOEB, G. M., R. KARBAN, AND D. HOUGEN-EITZMAN
Direct and indirect competition between spider mites feeding on grapes 699–707
SULLIVAN, T. P., AND W. E. KLENNER
Influence of diversionary food on red squirrel populations and damage to crop trees in young lodgepole pine forest 708–718
ROSSI, R. E., P. W. BORTH, AND J. J. TOLLEFSON
Stochastic simulation for characterizing ecological spatial patterns and appraising risk 719–735
KODRIC-BROWN, A., AND J. H. BROWN
Incomplete data sets in community ecology and biogeography; a cautionary tale 736–742
ZHANG, L., J. A. MOORE, AND J. D. NEWBERRY
Estimating asymptotic attributes of forest stands based on bio-mathematical rationales 743–748
COLLINS JOHNSON, N.
Can fertilization of soil select less mutualistic mycorrhizae? 749–757
